[CELLULAR RESPIRATION?AN OVERVIEW](#)

What are the phases of cellular respiration?Why?All cells need energy all the time, and their primary source of energy is ATP. The methods cells use to make ATP vary depending on the availability of oxygen and their biological make-up. In many cases the cells are in an oxygen-rich environment. For example, as you sit and read this sentence, you are breathing in oxygen, which is then carried througho...
